SUMMARY SHEET

I. Description of Item:

A resolution approving a contract in the amount of \$727,000.00 with the Military Department of Tennessee and the Tennessee Emergency Management Agency, to fund costs related to Public Safety Interoperable Communications (PSIC) grant associated with implementing the Statewide Communication Interoperability Plan (SCIP). This project will provide backup portable radio tower capability and a cache of radios to support the communications needs of public safety responders during an emergency and this item requires the expenditure of pass through grant funds under the U.S. Department of Homeland Security grant programs in the amount of \$727,000.00 and amending the FY 2009-2010 operating budget.

II. Source and Amount of Funding:

The Military Department of Tennessee and the Tennessee Emergency Management Agency provides grant funds in the amount of \$727,000.00 for the provision of pass-through funding from the United States Department of Homeland Security, Grant Program.

III. Contract Items:

Type of Contract – Grant Agreement Between the Military Department of Tennessee, Tennessee Emergency Management Agency and Shelby County.

IV. Additional Relevant Information:

Additional radios will be provided to incoming mutual aid responders to allow them to communicate on the local command and tactical channels, including the National and State Interoperable Channels. These portable towers and radio caches will be pre-positioned throughout District 11. District 11 includes Shelby, Fayette, Tipton, and Lauderdale Counties. The public safety agencies involved will include police, sheriff, fire, EMS, and EMA in these counties.

This project will also include training and development of Communications Unit Leaders (COML), as well as training for dispatch and public safety personnel in radio operations and interoperability. Training will be provided to prepare personnel to oversee the communications operations during emergency incidents. The communications training will result in better coordination of communication activities in emergency scenes. It will also help assure that agencies throughout the region and state are operating under similar communications guidelines.

Operation and Maintenance (O&M) costs are allowed under PSIC. However, O&M costs must be new costs with a direction correlation to the overall success of the grant project. Examples include, but are not limited to: satellite fees, hosting costs, cellular service, provider services, or commercial applications. O&M costs determined to be allowable will not be funded past the end of the PSIC (June 2010). Furthermore, a plan for sustainability of these O&M costs must be provided by the grantee.

Administration recommends approval of this resolution.
